THAMI IMAMI

Engineering student | Electronics & embedded systems

Toulouse, France · thamiimami344@gmail.com

LinkedIn : thami-imami-399986334 · thamiii24.github.io

First-year engineering student at ENSEEIHT, studying Electrical Engineering, Electronics and Automatic Control. Interested in electronics, embedded systems and semiconductor physics.

EDUCATION

2026 - 2029 | ENSEEIHT, Toulouse

Engineering degree in Electrical Engineering, Electronics and Automatic Control. Expected graduation: 2029.

2024 - 2026 | Lycée Moulay Youssef, Morocco

Intensive preparatory classes for engineering schools: MPSI, then MP*. Coursework in mathematics, physics and engineering sciences.

2024 | Baccalaureate, Mathematics

Morocco · Highest honours (Très Bien).

SCIENTIFIC PROJECT | TIPE

Optimising photovoltaic panel power through mechanical and electrical control loops

• Built and tested a single-axis solar tracker using Arduino and two LDR light sensors.

• Achieved reliable light tracking and observed an improvement in recovered power.

• Studied and simulated MPPT control; this component was not implemented experimentally. Simulation tools: Python and Tinkercad.

TECHNICAL SKILLS

Programming: Python, C
Scientific computing: MATLAB, NumPy, Matplotlib
Electronics and prototyping: Arduino, Tinkercad, LDR sensors

LANGUAGES

Arabic: native · French: C1 · English: B2 · Spanish: A1

ENGAGEMENT & INTERESTS

Climate Fresk: collaborative climate change workshop.
Le Procès de King-Kong: awareness of harassment, consent and gender-based violence.
Futurs Proches: talks on environmental and social challenges.

Weekly recreational football, swimming and running · Music and cinema.
