THAMI IMAMI

ENGINEERING STUDENT · ENSEEIHT

Electronics & embedded systems

thamiimami344@gmail.com

After two years of preparatory classes in Morocco, I joined ENSEEIHT in Toulouse to study Electrical Engineering, Electronics and Automatic Control. My interests lie in electronics and embedded systems.

SKILLS

Programming

Python · C

Scientific computing

MATLAB
NumPy · Matplotlib

Electronics

Arduino · Tinkercad
LDR sensors

LANGUAGES

Arabic
Native

French
C1

English
B2

Spanish
A1

EDUCATION

2026 - 2029

ENSEEIHT · Toulouse

Engineering degree in Electrical Engineering, Electronics and Automatic Control. First year; expected graduation in 2029.

2024 - 2026

Lycée Moulay Youssef · Morocco

MPSI / MP* preparatory classes for engineering schools. Mathematics, physics and engineering sciences.

2024

Baccalauréat · Mathematics

Morocco · Highest honours (Très Bien).

SCIENTIFIC PROJECT · TIPE

Optimising photovoltaic panel power

Mechanical and electrical control loops

• Built and tested an Arduino single-axis solar tracker using two LDR sensors.

• Achieved reliable light tracking and observed improved power recovery.

• MPPT studied theoretically and simulated, without experimental implementation.

• Simulation tools: Python and Tinkercad.
